

# Tannin™ Has It.

PUREX DDM

[tannincorp.com](http://tannincorp.com)

## COMPOSITION

This is a Bio-Collagen with high fullness and compaction power.

## SPECIFICATIONS

Appearance	Liquid, amber cream
Concentration	53 - 57%
pH (10% Solution)	6.8-7.1
Storage Stability	Shelf life of at least two years when stored in the original sealed packaging at temperatures between 30-40 °C.
Freeze/Thaw Stability	Avoid Freezing.

## KEY PROPERTIES

**PUREX DDM** can be used in the tanning and re-tanning of leathers at chrome, vegetable tanned leathers, and Wet White. It gives to the leather an excellent fullness. It has good characteristics of resistance in the physical tests, is ideal for nubucks, boxcalf, pull up and for Tec Boot leather and upholstery. **PUREX DDM** could be used in tanning and pre-tanning process, and after neutralizing in combination with acrylic to increase the fullness and firmness power. Used for light colors of leather and have great dispersant power the dye. It gives a higher and finer grain.

## APPLICATION

The percentage of **PUREX DDM** to employ in the tanning process is from 2-4% and 2-8% in the re-tanning process, according to the desired effect on the leather. It is ideal for the shading of colors, as dispersant agent and auxiliary in light colors. **PUREX DDM** can be used in combination with other agents like synthetic retanning, vegetable and anionic oils. It is usually added directly without previous dilution, but may also be dissolved in water at 1-3 ° C 38.
