

Tannin™ Has It.

LIONSYN CAV

tannincorp.com

COMPOSITION

A fatliquoring agent for all types of leather and fur.

SPECIFICATIONS

Appearance	White liquid
Activity	52-54%
Charge	Anionic
Density (Lb/Gal)	8.0-8.5 lb/g
pH (10% Solution)	9.0-11.0
Storage Stability	Resistant to electrolytes in usual work concentrations
Freeze/Thaw Stability	When stored in original drums or containers under suitable conditions (between 5°C and 40°C) Lionsyn CAV has a minimum shelf life of 1 year from date of delivery. If affected by frost, the full contents of the drum must be gently heated and stirred thoroughly.
Lightfastness	Very good
Electrolyte Stability	Stable
Emulsification	Lionsyn CAV is a product in emulsion; therefore, its appearance (consistency and colour) can vary. The technical properties of application of the product will not be affected.

KEY PROPERTIES

- Excellent selective filling of loose fiber areas
- Very good emulsifying power
- Excellent dyeability
- Glazing for suede
- Does not result in oily fur
- Electrolyte stable
- Very good light and heat fastness
- Useful to stabilise unstable fatliquoring mixtures.
- Deep and uniform penetration
- Good wetting back agent for dried wet blue and crust

APPLICATIONS

LIONSYN CAV is applied in pickle, tanning, retanning and fatliquoring for all types of leather and fur.
